(risk management1: The process of analysing exposure to risk and determining how best to handle such exposure)

For: Those interested in finding out more about an emerging field: risk management.

Presenters: Practitioners with experience in a range of fields, including O H & S, human factors, and emergency services.

Program:

1. The basics-including: Risk; Threat; AS4360; Risk Assessment; Safety Management Systems; Safety Climate and Safety Culture.
2. In practice: examples; illustrations; skills and tools.
3. A practical exercise: Risk Assessment.
4. Getting started and doing it: A panel to discuss issues.

(risk management2: A process that works perfectly until something actually goes wrong)
